

List of Publications on Plankton Investigations at D-1

Babkov A.I., 1978: The variability of the hydrological regime of Chupa inlet, the White Sea, in *Morphology, Systematic, and Evolution of animals* (Morfologiya, sistematika i evolyutsiya zhivotnykh). Leningrad. pp. 44 (in Russian).

Babkov A.I., 1982: The brief hydrological characteristic of Chupa inlet, the White Sea, in *Ecological Investigations of the Possible Objects for the Mariculture from the Fauna of the White Sea: Explorations of the fauna of the seas* (Ekologicheskie issledovaniya perspektivnykh ob'ektov marikul'tury fauny Belogo morya), 27(35). Leningrad: Zoological Institute AS USSR, pp. 3-16 (in Russian).

Babkov A.I., 1985: About the principles of determination of hydrological seasons (by the example of Chupa inlet, the White Sea), in *Explorations of the fauna of the seas: Biocenoses of the Chupa Inlet of the White Sea and their Seasonal Dynamics* (Biotsenozy guby Tshupa Belogo morya i ih sezonnaya dinamika), 31(39). Leningrad: Zoological Institute AS USSR. pp. 84-88 (in Russian).

Babkov A.I., 1985: Oceanological investigations at the White Sea Biological station of the Zoological Institute AS USSR, in *Hydrobiological and Ichthyological Investigations on the White Sea* (Gidrobiologicheskie i ichtiologicheskie issledovaniya na Belom more). Leningrad pp. 23-29 (in Russian).

Babkov A.I., 1998: *Hydrology of the White Sea*, (Berger, V.Ja., ed), Zoological Institute of RAS, O.A. Scarlato White Sea Biological station. St. Petersburg. 96 pp (in Russian).

Babkov A.I., V.Ju. Burjakov, 1992: Long-term abundance dynamics of zooplankton and hydrological regime in the baymouth of Chupa inlet of the White Sea, in *Proc. of the Conference on Problems of Investigation, Rational Exploitation, and Protection of Natural Resources of the White Sea* (Problemy izucheniya, ratsional'nogo ispol'zovaniya i ochrany prirodnykh resursov Belogo morya). Petrozavodsk pp. 107-108 (in Russian).

Babkov A.I., Kulakovskiy E.E., 1995: Year-to-year variability of water temperature of Chupa inlet of Kandalaksha Bay, in *Proc. of the Conference on Problems of Investigation, Rational Exploitation, and Protection of Natural Resources of the White Sea* (Problemy izucheniya, ratsional'nogo ispol'zovaniya i ochrany prirodnykh resursov Belogo morya). St. Petersburg pp. 40-44 (in Russian).

Babkov A.I., R.V. Prygunkova, 1974: Anomalies of zooplankton seasonal development and hydrological conditions in Chupa inlet of the White Sea, in *Proc. of the Conference on Hydrobiology and Biogeography of Shelves of Cold and Moderate Waters of the World Ocean* (Gidrobiologiya i biogeografiya shel'fov holodnykh i umerennykh vod mirovogo okeana). Leningrad pp. 99-100 (in Russian).

Babkov A.I., R.V. Prygunkova, 1985: The temperature pattern and zooplankton distribution in Kandalaksha Bay of the White Sea in connection with peculiarities of water dynamics, in *Explorations of the fauna of the seas: Biocenoses of Chupa Inlet and their Seasonal Dynamics* (Biotsenozy guby Tshupa Belogo morya i ih sezonnaya dinamika), 31(39). Leningrad: Zoological Institute AS USSR. pp. 89-93 (in Russian).

Babkov A.I., R.V. Prygunkova, 1997: On dynamics of water temperature and Calanus abundance in the White Sea, in *Ecological Investigations of the White Sea Organisms* (Ekologicheskie issledovaniya belomorskich orgnizmov). St. Petersburg. pp. 5-6 (in Russian).

Babkov A.I., R.V. Prygunkova, I.P. Kutcheva, 1988: Comparative characteristics of zooplankton distribution and hydrological conditions near island Sonostrov and in Chupa inlet of Kandalaksha Bay, in *Explorations of the Fauna of the Seas*, 39(47). Leningrad: Zoological Institute AS USSR. pp. 50-64 (in Russian).

Babkov A.I., R.V. Prygunkova, I.P. Kutcheva, 1987: Hydrological peculiarities of some localities in the South-East part of Kandalaksha Bay, in *Proc. of the Conference on Problems of Investigation, Rational Exploitation, and Protection of Natural Resources of the White Sea* (Problemy izucheniya, ratsional'nogo ispol'zovaniya i ochrany prirodnykh resursov Belogo morya), 1. Kandalaksha. pp. 123-126 (in Russian).

Ivanova S.S., 1963: Zooplankton of Chupa inlet, in *Materials on complex exploration of the White Sea* (Materialy po kompleksnomu izuchenyu Belogo morya), 2. Moscow-Leningrad: AS USSR. pp. 17-31 (in Russian).

Khlebovich T.V., 1988: Qualitative composition and seasonal changes of abundance of phytoplankton in Chupa inlet of the White Sea, in *Seasonal Events in the Life of the White and Barents Seas: Explorations of the fauna of the seas*, 13(21). Leningrad: Zoological Institute AS USSR. pp. 56-64 (in Russian).

Kokin K.A., T.I. Koljtzova, T.V. Khlebovich, 1970: The composition and the dynamics of the phytoplankton along the Karelian coast of the White Sea. *Botanical Journal*. (Botanicheskii zhurnal), 55(4), pp. 499-509 (in Russian).

Kutcheva I.P., 1997: Dominant species of spring and summer zooplankton of Chupa inlet, in *Ecological Investigations of the White Sea Organisms* (Ekologicheskie issledovaniya belomorskich orgnizmov). St.Petersburg. pp. 46-47 (in Russian).

Kutcheva I.P., 2001: About congruence of results of zooplankton sampling with different nets, in *Proc. of International Conference on Biological Basis of the Stable Development of Coastal Marine Ecosystems* (Biologicheskie osnovy ustoichivogo razvitiya pribrezhnykh morskich ekosistem), held in Murmansk, April 25-28, 2001. Apatity. pp. 129-130 (in Russian).

Pertzova, N.M. and R.V. Prygunkova, 1995: Zooplankton, in *The White Sea: Biological Resources and Problems of their Rational Exploitations, Part 1: Explorations of the Fauna of the Seas* (Beloe more: Biologicheskie resursy i problemy ih ratsional'nogo ispol'zovaniya), 42(50). St. Petersburg: Zoological Institute RAS, pp. 115-141 (in Russian).

Prygunkova, R.V., 1961: Seasonal changes of Chupa inlet zooplankton, Kandalaksha Bay, the White Sea, in *Proc. of the Session of the Scientific Council on Biological Resources of the White Sea and Inland Waters of Karelia* (Sessiya uchenogo soveta po probleme Biologicheskie resursy Belogo morya i vnutrennich vodoemov Karelii - SUSPBR), Dec. 11-14 1961. Petrozavodsk. pp. 25-26 (in Russian).

Prygunkova, R. V., 1966: Abundance dynamics of planktonic Crustacea in Chupa inlet of the White Sea in connection with changes of water bodies temperature regime, in *Proc. of the Sixth Session of the Scientific Council on Biological resources of the White Sea and inland waters of Karelia* (Shestaya sessiya uchenogo soveta po probleme Biologicheskie resursy Belogo morya i vnutrennich vodoemov Karelii), April 1966. Petrozavodsk. pp. 141-143 (in Russian).

Prygunkova, R. V., 1967: Changes of number of abundant species of the White Sea zooplankton in 1961 and 1962, in *Explorations of the Fauna of the Seas: Hydrobiological Investigations on the Karelian Coast of the White Sea*, 7(15). Leningrad: Zoological Institute RAS. pp. 203-209 (in Russian).

Prygunkova, R. V., 1968.: On the life-cycle of *Calanus glacialis* Jashnov in the White Sea. *Reports of the AS USSR (Doklady AN SSSR)*, 182(6), pp. 1447-1450 (in Russian).

Prygunkova, R. V., 1968: On the life-cycle of *Calanus glacialis* in the White Sea, in *Proc. of The Seventh Session of the Scientific Council on Biological Resources of the White Sea and Inland Waters of Karelia*. (Sed'maya sessiya uchenogo soveta po probleme Biologicheskie resursy Belogo morya i vnutrennich vodoemov Karelii). Petrozavodsk. pp. 107-108 (in Russian).

Prygunkova R. V., 1968: Life-cycles of abundant planktonic Copepoda of the White Sea, in *Proc. of the Accounting Scientific Session on the Results of Work in 1968* (Materialy otchetnoi nauchnoi sessii po itogam raboty v 1968 godu). Leningrad: Zoological Institute AS USSR. pp. 10-11 (in Russian).

Prygunkova, R. V., 1972: Description of previously unknown male of *Neoscolecithrix farrani* Smirnov (Copepoda) from the White Sea, in *Proc. of the Zoological Institute AS USSR*. (Trudny Zoologicheskogo Instituta AN SSSR), 52, pp. 251-252 (in Russian).

Prygunkova, R. V., 1973: Dependence of vertical distribution of zooplankton in the White Sea on dynamic conditions of water bodies, in *Proc. of the Accounting Session on the Results of Work in 1972* (Materialy otchetnoi sessii po itogam raboty v 1972 godu). Leningrad: Zoological Institute AS USSR. p. 20 (in Russian).

Prygunkova, R. V., 1974: Some peculiarities of seasonal development of zooplankton in Chupa inlet of the White Sea, in *Explorations of the Fauna of the Seas: Seasonal Events of Life of the White and Barents Seas*, 13(21). Leningrad: Zoological Institute AS USSR. pp. 4-55 (in Russian).

Prygunkova, R. V., 1975: On periodical changes in the seasonal development of zooplankton in the White Sea, in *Proc. of Conference on Shelf Biology* (Biologiya shel'fa). Vladivostok. pp. 140-141 (in Russian).

Prygunkova, R. V., 1977: Some peculiarities of zooplankton distribution in different parts of Kandalaksha Bay (the White Sea), in *Marine Biology* (Biologiya morya). Vladivostok, N o. 2, pp. 27-33 (in Russian).

Prygunkova, R.V., 1977: Zooplankton of Kandalaksha Bay in comparison with zooplankton at decade station D-1 in Chupa inlet (the White Sea), in *Explorations of the Fauna of the Seas*, 19(27). Leningrad: Zoological Institute AS USSR. pp. 100-108 (in Russian).

Prygunkova, R.V., 1978: On the influence of mixing intensity of water bodies on year-to-year changes of *Pseudocalanus elongatus* (Boeck) abundance in the White Sea, in *Proc. of the II All-Union Conference on Shelf Biology* (II Bsesoyuznaya konferentsiya po biologii shel'fa.), Part 2. Kiev. pp. 91-92 (in Russian).

Prygunkova, R.V., 1979: Year-to-year changes of *Pseudocalanus elongatus* seasonal migrations in the White Sea, in *Marine Biology* (Biologiya morya), No. 1, Vladivostok, pp. 10-16 (in Russian).

Prygunkova, R.V., 1982: On the possibility of prognosis of *Pseudocalanus elongatus* (Boeck) abundance in the White Sea, in *Explorations of the Fauna of the Seas : Ecological Investigations of the Possible Objects for the Mariculture from the Fauna of the White Sea* (Ekologicheskie issledovaniya perspektivnykh ob'ektov marikul'tury fauny Belogo moray), 27(35). Leningrad: Zoological Institute AS USSR. pp. 72-83 (in Russian).

Prygunkova, R.V., 1982: Year-to-year changes in places of zooplankton concentration in the White Sea, in *Proc. of the First Coordinating Meeting on Enhancement of the Productivity and Rational Exploitation of the White Sea Biological Resources* (Povyshenie produktivnosti i ratsional'noe ispol'zovanie biologicheskikh resursov Belogo morya). Leningrad. pp. 70-71 (in Russian).

Prygunkova, R.V., 1985: About some causes of year-to-year changes of zooplankton distribution in Kandalaksha Bay of the White Sea, in *Marine Biology* (Biologiya morya), Vladivostok, No. 4, pp. 9-16 (in Russian).

Prygunkova, R.V., 1985: Comparison of the structure and abundance of zooplankton in Kandalaksha and Onega Bays, the White Sea, in *Proc. of the Conference on Problems of Investigation, Rational Exploitation, and Protection of the Natural Resources of the White Sea* (Problemy izucheniya, ratsional'nogo ispol'zovaniya i ochrany prirodnykh resursov Belogo morya). Arkhangelsk. pp. 167-168 (in Russian).

Prygunkova, R.V., 1985: Differences in terms of biological seasons of Chupa inlet zooplankton (the White sea) in different years, in *Biocenoses of Chupa inlet of the White Sea and their Seasonal Dynamics* (Biotsenozy guby Chupa Belogo morya i ih sezonnaya dinamika). Leningrad. pp. 99-108 (in Russian).

Prygunkova, R.V., 1985: On influence of year-to-year changes of Copepoda abundance on dynamics of herring catches in Kandalaksha Bay, in *Proc. of Conference on Problems of Investigation, Rational Exploitation, and Protection of the Natural Resources of the White Sea* (Problemy izucheniya, ratsional'nogo ispol'zovaniya i ochrany prirodnykh resursov Belogo morya). Arkhangelsk. pp. 165-167 (in Russian).

Prygunkova R.V., 1987: About investigations of zooplankton at the White Sea Biological station of Zoological Institute AS USSR, in *Hydrobiological and Ichthyological Investigations of the White Sea* (Gidrobiologicheskie i ichtiologicheskie issledovaniya na Belom more). Leningrad. pp. 30-50 (in Russian).

Prygunkova R.V., 1987: Spatiotemporal changes of zooplankton structure and abundance in Kandalaksha Bay of the White Sea in summer period, in *Marine and Freshwater Plankton* (Morskoi i presnovodnyi plankton). Leningrad. pp. 68-82 (in Russian).

Prygunkova R.V., 1987: Tasks and prospects of investigation of zooplankton as an element of the White Sea ecosystems and fish diet, in *Proc. of the Conference on Problems of Investigation, Rational Exploitation, and Protection of Natural Resources of the White Sea* (Problemy izucheniya, ratsional'nogo ispol'zovaniya i ochrany prirodnykh resursov Belogo morya), 1. Kandalaksha. pp. 57-61 (in Russian).

Prygunkova, R.V., 1987: Zooplankton, in *Basic Courses of Scientific Investigations on the Problem of Enhancement of the Productivity and Rational Exploitation of the White Sea Biological Resources* (Osnovnye napravleniya nauchnykh issledovaniy po probleme "Povyshenie produktivnosti i ratsional'noe ispol'zovanie biologicheskikh resursov Belogo morya"). Leningrad. pp. 31-40 (in Russian).

Prygunkova, R.V., 1990: Zooplankton abundance dynamics in Kandalaksha Bay of the White Sea in connection with problem of yields of small kandalaksha herring generations, in *Proc. of Zoological Institute AS USSR* (Trudy Zoologicheskogo Instituta AN SSSR), 227, pp. 54-77 (in Russian).

Prygunkova, R.V., 1995: Long-term changes of Calanus abundance and herring catches in Kandalaksha Bay of the White Sea, in *Proc. of the Conference on Problems of Investigation, Rational Exploitation, and Protection of Natural Resources of the White Sea* (Problemy izucheniya, ratsional'nogo ispol'zovaniya i ochrany prirodnykh resursov Belogo morya). St.Petersburg. pp. 27-28 (in Russian).

Prygunkova, R.V., S.S. Burlakova, 1977: Influence of episodic movements of zooplankton on its vertical distribution in Kandalaksha Bay (the White Sea), in *Explorations of the Fauna of the Seas*, 19(27). Leningrad. pp. 109-114 (in Russian).

Prygunkova, R.V., I.P. Kutcheva, 1990: Characteristic of zooplankton structure of Kandalaksha Bay in different seasons of 1988, in *Proc. of the Conference on Problems of Investigation, Rational Exploitation, and Protection of Natural Resources of the White Sea* (Problemy izucheniya, ratsional'nogo ispol'zovaniya i ochrany prirodnykh resursov Belogo morya). Arkhangelsk. pp. 48-54 (in Russian).

Prygunkova, R.V., N.M. Pertzova, S.A. Slonova, N.L., A.D. Semenova, A.D. Naumov, V.V. Lukanin, V.V. Fedyakov, A.V. Gudimov, 1985: Zooplankton and zoobenthos as a part of the White Sea ecosystem and diet of fish, in *Proc. of the Conference on Problems of Investigation, Rational Exploitation, and Protection of Natural Resources of the White Sea* (Problemy izucheniya, ratsional'nogo ispol'zovaniya i ochrany prirodnykh resursov Belogo morya). Arkhangelsk. pp. 17-23 (in Russian).

Piaskovsky R.V., 1963: About long-term changes of bottom salinity of the White Sea, *Oceanology* (Okeanologiya), 3(1), pp. 44-48 (in Russian).

Savoskin Yu. M.: Main features of the regime of hydrology and hydrochemistry of Chupa inlet, the White Sea: Account of the hydrological investigations in Chupa inlet of the White

Sea from 1957 to 1967. *Funds of the Zoological Institute AS USSR (White Sea Biological station)*, 250 pp. (in Russian, unpublished).

Savoskin Yu. M., 1968: Some peculiarities of mixing regime in Chupa inlet of the White Sea, in *Proc. of the Seventh Session of the Scientific Council on Biological resources of the White Sea and Inland Waters of Karelia* (Sed'maya sessiya uchenogo soveta po probleme "Biologicheskie resursy Belogo morya i vnutrennich vodoemov Karelii" – SUSPBR). March 1968. Petrozavodsk. pp. 98-99 (in Russian).
